

PROJECT: ~~Approved For Release 2000/08/08 : CIA-RDP96-00789R000300450003-7~~  
 DATE: 27 FEB 87  
 SESSION: 02  
 SOURCE: 01

START: 1013  
 SANCTUARY: - -  
 TARGET: 1020  
 FINISH:           

SG1A

COORDINATE: 

## FRONTLOAD:

"This will be the same site as yesterday. Initial review indicates a high probability that you were successful in acquiring the site. Today we will return and continue to identify the major gestalts of the site. When I am satisfied that you ~~are~~ ready we will begin describing the ~~uses~~ of the various structures as well as ~~their~~ purpose"

- \* "Some difficulty getting office out of (her) mind"  
(conversations with FERN) ??!!
- \*\* Some sporadic heater noises.

## NOTES:

- ① No known or stated inclemencies
- ② Cloudy, weather changing - chilly moving toward sleet/pain
- ③ It's Friday
- ④ 2<sup>nd</sup> day in ~~a~~ row for same source

DRAFT:             
 TYPING:             
 PROOF:             
 CORRECT:             
 OPS:

SG1A

(024)

★ FEELING OF BEING IN A LARGE VEHICLE, LIKE A LIMOUSINE, (IMPORTANT PEOPLE - ATTENTION HAS BEEN DRAWN BACK TO PIPE LIKE AREA)

→ STAY IN THAT AREA THEN

★ HEAVY PRESSURE FEELING, (DEEP SIGH), FEEL LIKE I'M BEING PULLED, GRAVITATIONAL FORCES PULLING ME AWAY,

→ DESCRIBE THE PIPE LIKE AREA

★ ITS A STRUCTURE, ITS ROUNDED LIKE HALF A SPHERE, RADIATING GLOW, AROUND IT, BARRAGE LIKE AFFECT, WAVY, TRANSPARENT, VERY WARM, VERY HOT, GIVING OFF HEAT RAYS. THERE IS A GLOW TO IT, PULSING, ~~THE DROPS~~ THROBBING

→ CONTINUE TO DESCRIBE THIS AREA

★ THE ~~SOIL~~ IMMEDIATELY SURROUNDING THIS THING IS VERY DRIED, DOL LIKE PORES IN A PIECE OF STYROFOAM, TUBES OR PIPES ARE VERY COLD ALMOST IF I PUT MY BARE SKIN AGAINST THEM IT WOULD STICK.

→ CONTINUE TO FOCUS AROUND THIS OBJECT

★ PIPE LIKE THINGS SEEM TO BE DRAWING SOURCE FROM EARTH, MATERIAL, MAN-MADE MATERIAL BUT DRAWING NATURAL SUBSTANCE FROM SOIL - SALTY TASTE, NOT LIKE SALT WATER, ITS MORE PURE, SHARPER TASTE, THERE ~~ARE~~ LINES ON THIS HALFS-SPHERE CREATING A PATTERN, BECAUSE OF THIS THEY CONVERGE AT THE TOP AND ARE SMALLER - like something stretched over a skin like a skin - There IS CLEAR WATER OR SOMETHING <sup>catching heat</sup> REFLECTING ~~the~~ HEAT BACK ON TO THE TUBES, REFLECTING, VERY WELL LAND OUT,

- STAY WITH THIS OBJECT - FOCUS INSIDE
- ★ THERE IS A HISSING SOUND LIKE STEAM, LIKE A STEAM ROOM. A HEAVY SMELL OF SULPHUR
- CONTINUE TO DESCRIBE THE INSIDE
- ★ I HAVE TO COME DOWN AND TAKE A BREAK -  
(COMFORT BREAK) (1039)
- CONTINUE TO DESCRIBE INSIDE THE HALF SPHERE (1042)
- ★ STRANGE THING IN CENTER LIKE A HALF CIRCLE - IT'S A ...  
LIKE A WELL - I LOOKED DOWN AND IT LOOKED LIKE A BLACK  
BOTTOMLESS PIT - LIKE A VACUUM - IT SUCKS OUT THE AIR  
WITHIN THIS THING - THE AREA SEEMS TO BE FILLED WITH A  
MISTY, CLOUDED GAS
- DESCRIBE THE SMELLS
- ★ OZONE, LIKE OZONE, DAMP, MOULDY, EARTHY, MIXED WITH  
CRISP COOL ALMOST A SWEETNESS - PASSES IN WAVES, LIKE  
CIRCULATING WAVES, VERY LIGHT HEADED ALMOST - EUPHORIC,
- CONTINUE TO DESCRIBE THE INSIDE
- ★ COLDNESS, PENETRATING COLD, A SHIFTING AN IMAGE TO AN  
UPSIDE DOWN MUSHROOM, HOLLOW, UGLY THICK WALLS, I  
THEN GET A FEELING OF SUCKING ON A STRAW, LIKE PUTTING  
YOUR FINGER ON THE ~~END~~ END AND SUCKING AND THEN RELEASING,  
LIKE AN OVERFLOW TANK - INSIDE THERE ARE SEMI-CIRCLE -  
HALF CIRCLE, SPHERES
- TELL ME ABOUT THESE SPHERES

4

- ★ They are like coils on a refrigerator, banded very close together very close to the ground - like you would set up a building that you didn't intend people to inhabit, more for testing something; researching something -
  - Focus on the well
- ★ Feeling of heat coming from it, a red glow,
  - Tell me about this heat
- ★ It's like a natural heat, like a cap or core of a volcano, with something built over the top, again a very heavy ~~red~~ mineral, sulphur like smell, there's crushing pressure in here, like all the air has been sucked out
  - Describe your location
- ★ Inside the sphere, still pressure
  - Focus inside the well
- ★ Seems to be a lining of some type, very hard substance, smooth, brushed like brushed stainless steel,
  - Continue to focus inside - continue to center the well
- ★ As you go down it branches off, it's very deep - two directions, as though one drains something off while one direction lets something in - A flow feeling A&C in goes good air out goes bad air
  - Continue down
- ★ FURTHER down you as the more strong the odors - mixture of strong sulphur and pronounced sweet, coal, tasteless odorless type

- Describe your location now
- ★ Still in the well - a buoyant or bobbing feeling, not a liquids but up and down as though being buffeted about like a ball in an air tube - This AOE - got blown out of it
- Describe Blowout out
- ★ Break out of it like a pop -
- Remain in the sphere - continue to describe
- ★ a coating of like dry ice, produced by atmosphere but also a necessary functional part - oh (sigh) --
- Describe the functions of this sphere
- ★ (sigh, sigh) Isolation, attempting to separate, isolate, making a product, making something, like a centrifuge it separates different properties of gassy substance, very controlled,
  - Comfort Break (11:02) -

(END) (Sessions)

Site was large sphere in open area. Sphere was a very intense white and there were ridge like bands of tan surrounding it. There was a pattern of intersecting lines around the circumference and perpendicular to the ground, converging at the top.

Inside the sphere there was a very distinct moisture of this - sulphur + mineral damp and sweet + clean smell. They would sit in areas like crystallized. There were handle pipes, bent to the ground. Around the circumference, walls + building of solid moisture, like the cells of a fungus.

In the center of the sphere was a well-like opening, built with a metallic, metal, like material (like plaster or steel). There was a pulley set for coming from deep inside the "well". In building, there was a branch to either side (white stalk containing stone) and there was a feeling of movement of air from one side up the stalk and a movement down to the other side.

Second structure was like an upside-down mushroom, hollow + thick-walled. Again, there was a feeling of pressure being applied and reverberations like an airless tank.

The pipe-like structures "in front" (from my perspective) were leading to the earth. An indication of connection to my man-made structure (other than sphere). It was as though they were pulling something from the soil or earth.

almost 3 or 4 month mail pull.
